

**Admission Medication Reconciliation
2East / Pharmacy Pilot Project
Phase 2 Education Questionnaire**

Nursing

1. The goal of the pilot is to perform and document the initial admission medication reconciliation within at least:
 - a. 4 hours
 - b. 6 hours
 - c. At the end of each shift
 - d. 24 hours

2. The Admission Medication Reconciliation Form that prints on the nursing should initially go behind the “CYA” tab. It should only be moved to the “Orders” section, if used by nursing, pharmacy and/or the prescriber as an order.
 - a. True
 - b. False

3. There are five possible messages nursing will see on the MAR. The three that require their action by the end of the shift is:
 - a. Complete, Form Incomplete and Blank
 - b. Complete, Blank and Contact the MD
 - c. Blank, Complete and Contact the MD
 - d. All messages
 - e. Any that “pink-up”

4. The main reason Admission Medication Reconciliation Forms print Blank with no meds on them is?
 - a. The patient wasn’t taking any home medications
 - b. The admitting nurse “back-times” the Medications Prior to Admission Assessment
 - c. Downtime
 - d. The medication interview had not yet occurred

5. When patients do not know what they are taking or are unable to verbalize their med lists, other places we may find this information is:
 - a. Family
 - b. Universal Med Forms
 - c. Friends
 - d. Retail Pharmacies
 - e. All of the above

6. When this information is later received from an outside source other than the prescriber, the proper way to update it is:
 - a. Hand write the information on the Adm Med Rec Form
 - b. Enter in Meditech as follows: [New Assessment] - [Recall Values] – (add / edit the new information)- [File] – [Submit] then Scan to Pharmacy and place in the chart (CYA)
 - c. Enter in Meditech by editing the current Medication Prior to Assessment
 - d. No need to update. Items will be reconciled at discharge

7. When clarifying orders with the prescriber, the proper way to update it is:
 - a. Hand write the information on the Adm Med Rec Form
 - b. Scan to Pharmacy
 - c. Place the updated and scanned form in the “Orders” section of the chart
 - d. Enter in Meditech as follows: [New Assessment] - [Recall Values] – (add / edit the new information)- [File] – [Submit] then Scan to Pharmacy and place in the chart (CYA)
 - f. All of the above

8. All items that “pink-up” should be handled prior to leaving your shift to ensure no vital medications are missed, duplicated or result in error.
 - a. True
 - b. False
